

1. This will be a group project, that means no solo project will be allowed even if anyone prefers to work that way.
2. The group will strictly consist of 3 members. In case any special situation arise, please take permission from your respective lab faculties.
3. The group member is only allowed to be within the section. Any cross section grouping is strictly prohibited.
4. The project must be 3D based on Assignment 3. (Else you will be awarded with a 0)
5. You are only allowed to use the OpenGL library functions that are present in the template code of assignment 3. However, if you need better visualization, you can use `GL_Depth()` if you want.
6. The project should not be anything very common and found on the internet. Any idea taken from somewhere should have some form of novelty in the project for which students will be highly rewarded.
7. Any group member should be able to explain any part of the project, whether or not he/she has done that particular part or not during viva. Depending on this, your individual mark may differ although it's a group project.
8. You can't submit the same/similar project that you did in the previous semester **in case of retake/repeat**. Doing so will have the same penalty of plagiarism.
9. All the projects should be submitted by a single person of each group in the google form.
